

Enquiry Closed: Reason Criteria

RoofBuddy sales team. Agreed at sales meeting, 28 July 2026. Supersedes previous CRM list.

REASON	USE WHEN	REQUIRED BEFORE YOU CLOSE
No Contact	Zero two way communication has ever happened. They have never picked up, replied, or responded.	Minimum 2 calls, 2 texts, 1 email. No maximum. Re roof or high value: roll to end of week with further touchpoints. If only one contact detail works, use it, then close. Reopen if they come back.
Price Indication: Owner	They own the property, they want a ballpark for GSeal or a re roof, they are not proceeding now.	The figure you gave pasted into notes, or a copy of the template email.
Price Indication: Pre purchase NEW	They do not own it yet, or they are planning ahead. Looking to buy, just bought, doing it next year.	Same note requirement. Split from Owner because these two are different audiences for anything we send later.
Out of Budget	They own the roof, they have a real number from us, they cannot or will not fund it.	The quoted figure in notes. If they are only asking what it costs, that is Price Indication. Critical replacement rarely stops here. Cosmetic work genuinely does.
Too Small / Repairs	Small repair below our threshold. Currently referred to Ollie at Builder's Crack.	Log the referral. Fee arrangement still being formalised. Wrong trade entirely is Not Suitable, not this.
Dead / Fake	Every contactable detail fails. Email bounces, phone dead or wrong, address false. Also internal or accidental submissions, plus false premise leads such as the government roof grant clicks.	If any single detail works, this is not the reason. Attempt via that channel, then close as No Contact or Waiting on Info. Sanity check the address in Google Maps first.
Already Sorted	Resolved elsewhere. Work already done, or another provider engaged.	Note who did it if they tell you.
Not Suitable RENAMED	We do not sell what they need. Three sub reasons: no suitable product (caravan, motorhome, horse float, conservatory, Bondor board), wrong discipline (builder, electrician, glazier, skylights), no suitable solution (2017 roof asking for GSeal).	Pick the sub reason. Replaces "Not Suitable for GSeal", which was too narrow, so everything non GSeal was landing in the wrong bucket.
Waiting on Info	Two way contact has happened. The ball is in their court on a specific item: a photo, plans, a conversation with their partner, a third party who will call us.	Note exactly what you are waiting on. Test against No Contact: have they ever actually communicated with us. Yes, this. No, No Contact.
Duplicate Lead	Same customer, same job, submitted more than once across channels.	Reference the original enquiry in notes.
Out of Territory / No Coverage NEW	No service provider who can cover that area.	Be straight that coverage varies across New Zealand, offer to sanity check any quote they do get. If a good local roofer surfaces, invite them to join the network.
Roofer Application: Offered NEW	Roofer applied to join the network. We invited or accepted them.	Supplier records, not customer enquiries. Likely belongs on a separate close list so enquiry data stays clean.
Roofer Application: Declined NEW	Roofer applied. We declined them.	
Not a lead UNRESOLVED	Currently in the CRM. Not on the whiteboard, not discussed. Overlaps Dead / Fake, Duplicate, Out of Territory.	Do not use until it has a tight definition. Undefined catch alls absorb everything, which destroys the value of every other reason on this list.

NON NEGOTIABLE: NOTES

Every close needs notes. Calls and texts logged individually with date, time, number. "Followed up" is not a note.

This is what we use when a one star review lands and we need to show the customer was chased. If the lead is empty, we have nothing.

These reasons are also the basis for what we do with closed enquiries next, including targeted follow up and the repair referral stream. That only works if we all apply them the same way from day one.
